Programming Exercise 3-4

```
# Get number
number = int(input('Enter an integer from 1 - 10: '))

# Print Roman numeral
if number == 1:
    print ('I')
elif number == 2:
    print ('II')
elif number == 3:
    print ('III')
elif number == 4:
    print ('IV')
elif number == 5:
    print ('V')
elif number == 6:
    print ('VI')
elif number == 7:
    print ('VII')
elif number == 8:
    print ('VIII')
elif number == 9:
    print ('IX')
elif number == 10:
    print ('X')
else:
    print ('Error: Invalid Number')
```
